

Amended Claims:

1. (Currently Amended) An apparatus comprising ~~A mobile telecommunications device including~~ a housing, ~~a microphone, an earpiece,~~ a display screen mounted in the housing, a plurality of keys mounted on the housing and individually depressible ~~by a user~~ for performing telephony operations, radio circuitry, and a processor ~~operable~~ configured to provide a browser for navigating between different pages stored remotely of the mobile telecommunication device and displaying information therefrom on the display screen, wherein an individual key of said plurality of keys is ~~operable~~ configured to operate in a first mode comprising a first ~~user~~ depression sequence pattern of said individual key to navigate between previously visited pages and said individual key further being ~~operable~~ configured to operate in a second mode comprising a second ~~user~~ depression sequence pattern of said individual key to provide a display of previously visited pages ~~whereby~~ to permit the ~~user to select~~ selection of a page from the display of previously visited pages and ~~navigate the navigation~~ directly thereto.

2. (Currently Amended) An apparatus ~~A device~~ according to claim 1 wherein said individual key is operable to navigate backwards through previously visited pages.

3. (Currently Amended) An apparatus ~~A device~~ according to claim 1 wherein said individual key is operable to navigate forwardly through previously visited pages.

4. (Currently Amended) An apparatus ~~A device~~ according to claim 1 wherein the first and second modes are selected by operating said individual key for relatively shorter and longer periods respectively.

5. (Currently Amended) An apparatus ~~A device~~ according to claim 1 including a scrolling key operable to scroll a focus region through the display of previously visited pages for selecting one of the pages.

6. (Currently Amended) An apparatus ~~A device~~ according to claim 1 including a further key for selecting a page from the previously visited pages display so as to navigate directly thereto.

7. (Currently Amended) An apparatus ~~A device~~ according to claim 1 and comprising a mobile telephone handset.

8. (Currently Amended) An apparatus ~~A device~~ according to claim 1 and comprising a PDA.

9. (Currently Amended) An apparatus ~~A device~~ according to claim 1 wherein the display of the previously visited pages comprises a display of the previously visited pages whereby to permit the user to select one of the previously visited pages and navigate directly thereto.

10. (Canceled)

11. (Currently Amended) An apparatus ~~A device~~ according to claim 1, which is WAP enabled.

12. (Currently Amended) A method of operating configuring a browser to operate in ~~a mobile telecommunications device~~ an apparatus, including operating configuring an individual key of the device to operate in a first mode to navigate between previously visited pages, operating configuring the individual key to operate in a second mode to provide a display of previously visited homepages and selecting to select one of the pages from the display of previously visited homepages to navigate directly thereto.

13. (Currently Amended) An apparatus comprising ~~A mobile telecommunications device including~~ a browser configured to permit navigation ~~to navigate~~ between different network addresses and display information therefrom, and a key configured to operate

~~operable~~ in a first mode to navigate between previously visited network addresses and configured to operate ~~operable~~ in a second mode to provide a display of previously visited homepages ~~whereby~~ to permit the ~~user to select~~ selection of a homepage from the previously visited homepages display and ~~navigate~~ the navigation directly thereto.

14. (Currently Amended) An apparatus ~~A device~~ according to claim 13 including a key to scroll a focus region between suitable menu options displayed on the browser, to permit navigation between different network addresses.

15. (Previously Presented) The method of claim 12, wherein the first mode includes pressing the individual key for a first period of time and the second mode includes pressing the key for a second period of time, the second period of time greater than the first period of time.
